Dear FDA,

I'm writing re ^{3662 '01 MAY -9 P1:50} Docket no 99P-1340/CP1

I react violently to most perfumes with bleeding from the bladder and severe pain often causing me to scream uncontrolably. The ones that cause less severe problems still cause my skin to turn red and burn like I had a sunburn, and my lips blister. It takes days to heal. I also experience severe fatigue, headache, chest pain, difficulty breathing.

It brings on asthma attack with my little grandson. Perfume can't be made without talc. Talc is a proven cause of asthma. Asthma deaths have gone up 82% and asthma is up 61%.

Eternity is one of the worse

99P-1340

C 702

for me. Red, Talon, White Shoulders,
Joy, Chanel no 5, Jean Nate's, Charlis,
Sweed, Blue Grass, White Diamonds
all avon scents, Emeralds, are
just as bad. 1

Please follow your own
rules and put a warning label
on Eternity (and other fragrances).

Sincerely

Pelle Calina
